CORPORATE PROFILE CATALOGUE

Professional Solutions from Production to Application

Professional landscaping, environmental design and afforestation solutions for villa, residential complex and commercial-area projects.

COMPANY PROFILE

Adding Value to Nature, Designing Living Spaces

MİYAR GRUP is a professional solution partner serving in landscaping, environmental design, plant production, afforestation and project-based landscaping solutions.

With our İstanbul-based operations, our production sites in İzmir Ödemiş and our strong grower network across Türkiye, we deliver reliable solutions for villa projects, housing developments, residential complexes, restaurants, commercial areas and private living spaces.

With the right plant selection, quality application, a strong supply infrastructure and a sustainable landscaping approach, we add value to living spaces.

Prestigious Touches for Private Living Spaces

MİYAR GRUP delivers aesthetic, functional and sustainable landscape solutions for villa gardens. With formed trees, decorative stonework, walkways, roll turf, automatic irrigation systems and the right plant selection, it transforms villa gardens into prestigious living spaces.

- Bespoke Garden Design
- Use of Formed Trees
- Decorative Stone and Walkways
- Irrigation and Maintenance Planning

500+
UNIT PROJECT CAPACITY

Landscaping Solutions for 500+ Unit Projects

For large-scale residential complexes, residences and housing developments, we provide professional solutions to arrange shared living areas in an aesthetic, safe and sustainable way. From plant supply to site application, from walkways to lawn areas, we plan the entire process around each project's needs.

Shared Green Areas

Walkways

Playground Surroundings

Car-Park Perimeter Planting

Amenity Facility Landscaping

Lawn and Irrigation Systems

Landscape Designs That Elevate the Guest Experience

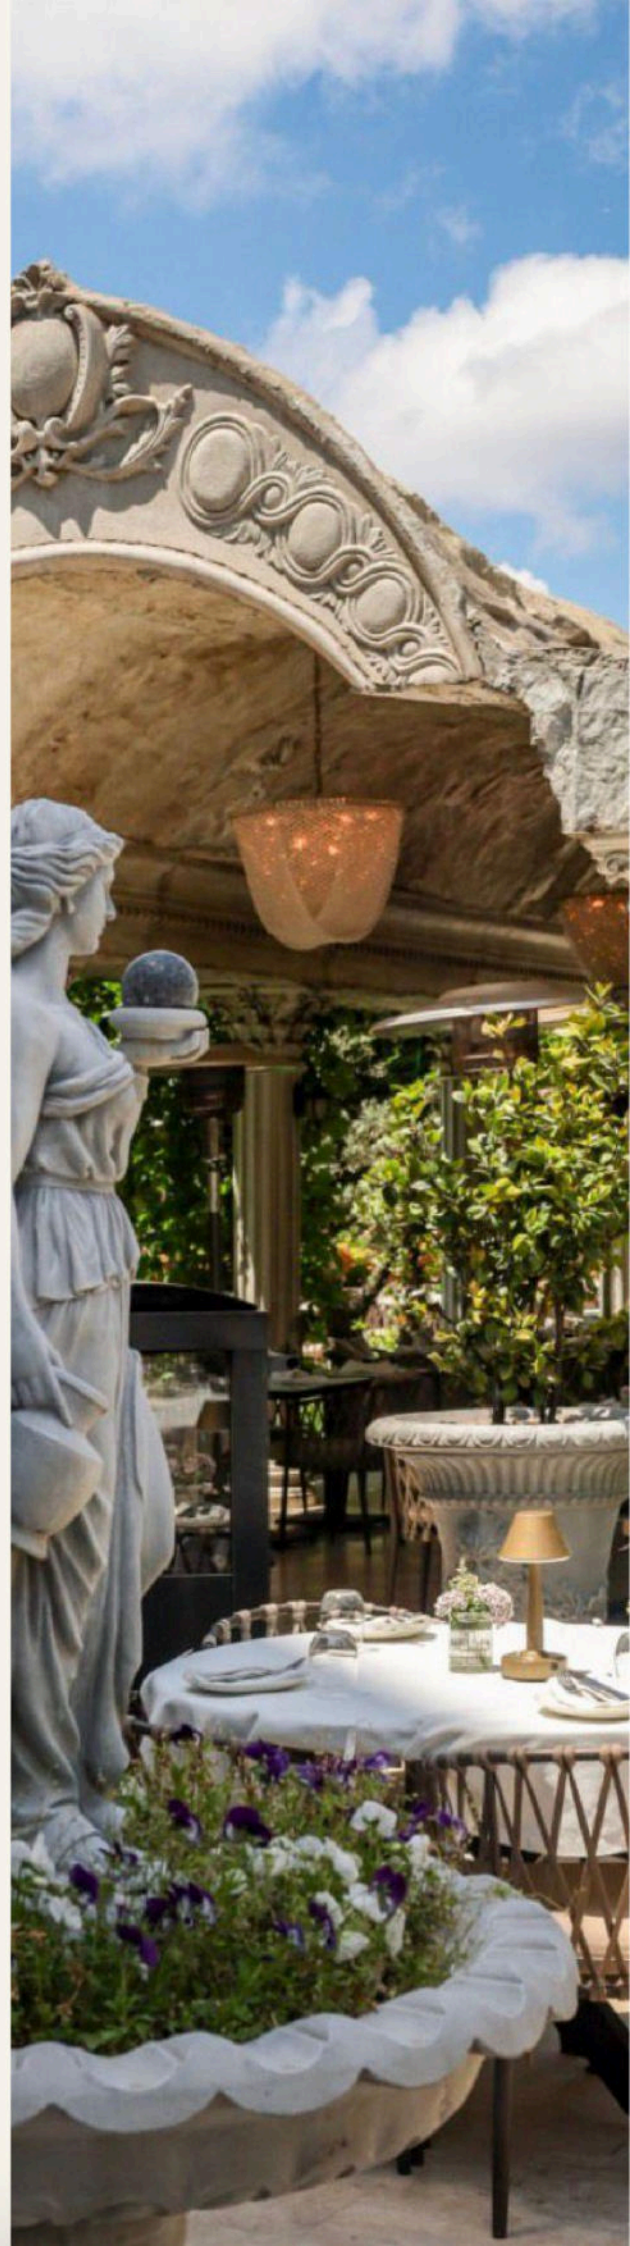

For restaurant, café and social-venue projects, we create inviting, aesthetic outdoor spaces in keeping with each venue's identity.

With plant selection, decorative planters, formed plants, shaded areas and atmosphere-building landscape details, we add value to these venues.

- Formed Plants and Decorative Planters
- Shading and Green-Wall Areas
- Atmosphere-Building Landscape Details

SOCIAL AREA LANDSCAPE

Strong Green Solutions for Public and Commercial Areas

For parks, recreation areas, roadsides, commercial facilities and public projects, we carry out afforestation, planting and environmental-design works. With long-lived, climate-appropriate and low-maintenance plant selections, we ensure projects create lasting value.

Turnkey Landscaping Services

We approach every project according to the site's needs, intended use, architectural structure and sustainability goals – managing every stage from production to application professionally.

10 Consultancy and Project Planning

Planned Process Management from Survey to Application

At MİYAR GRUP we progress methodically on every project, combining the right products with the right application methods to create long-lasting landscape areas.

01

Survey and Needs Analysis

Inspecting the site and defining expectations and intended use.

02

Plant and Site Planning

Selecting the right species and a landscape composition suited to the site.

03

Product Supply

Quality plant supply from our production site and grower network.

04

Site Application

Disciplined, planned application by professional teams.

05

Irrigation and Infrastructure

Installation of automatic irrigation and infrastructure systems.

06

Handover and Maintenance Plan

Sustainable maintenance and follow-up planning after handover.

Applications That Add Value to Living Spaces

Through villa gardens, complex landscapes, restaurant and social-venue projects, we bring living spaces of every scale together with nature. In every project we prioritise aesthetic appearance, quality plant use, application discipline and a sustainable landscaping approach.
